Office Action Summary	Application No. 10/825,205	Applicant(s) JUNG ET AL.	
	Examiner Justin R. Fischer	Art Unit 1747	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 30, 2010 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 18 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 recites the limitation "the dispensing position" in line 6. There is insufficient antecedent basis for this limitation in the claim. It is suggested that applicant amend the claims to initially define each liquid crystal panel as including a dispensing position

Claim 18 recites the limitation "the longitudinal direction" in line 7. There is insufficient antecedent basis for this limitation in the claim. It is suggested that applicant amend the claims to include the following language: a longitudinal direction.

Claim 18 recites the limitation "the downward direction " in line 8. There is insufficient antecedent basis for this limitation in the claim. It is suggested that applicant amend the claims to include the following language: a downward direction.

Claim 18 recites the limitation "the bottom surface " in line 10. There is insufficient antecedent basis for this limitation in the claim. It is suggested that applicant amend the claims to include the following language: a bottom surface.

Claim 18 further includes the language "connection port" in line 11. It is suggested that applicant amend the claims to include the following language: connection portion.

Claim 18 recites the limitation "the extension direction " in line 11. There is insufficient antecedent basis for this limitation in the claim. It is suggested that applicant amend the claims to include the following language: an extension direction.

Claim 18 further requires that the M nozzles are arranged in the extended direction of the connection portion. However, the M nozzles appear to extend in a direction (vertical direction) that is perpendicular to the extended direction of respective connection portions, which is in direct contrast to the claim requirement. Applicant is asked to clarify the arrangement without the introduction of new matter.

Claim 18 further includes the following language: the arrangement of M nozzle is perpendicular to the arrangement direction of N nozzles. This language fails to provide a clear and concise understanding of the claimed invention, especially since the character N is previously used to define the syringes. Additionally, it is unclear exactly

Art Unit: 1747

what arrangement this language is attempting to define. Applicant is asked to clarify the scope of the claimed invention without the introduction of new matter.
